

CSE 111 - Project Basketball Stats

Dustin Vy

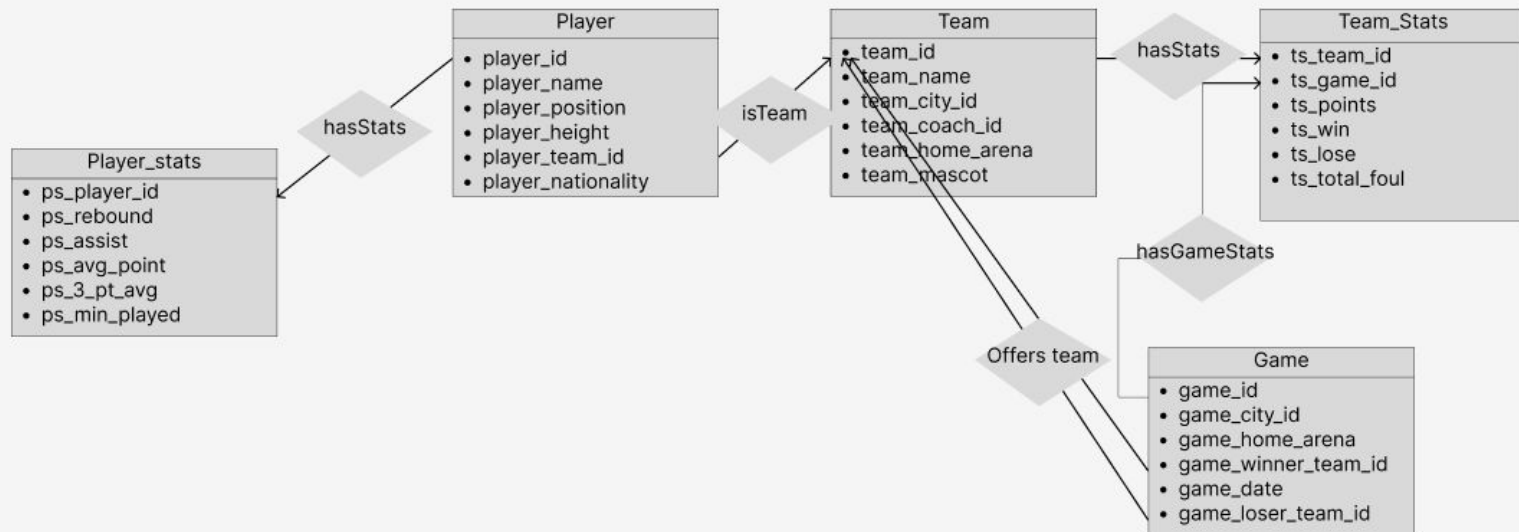

Phien Nguyen

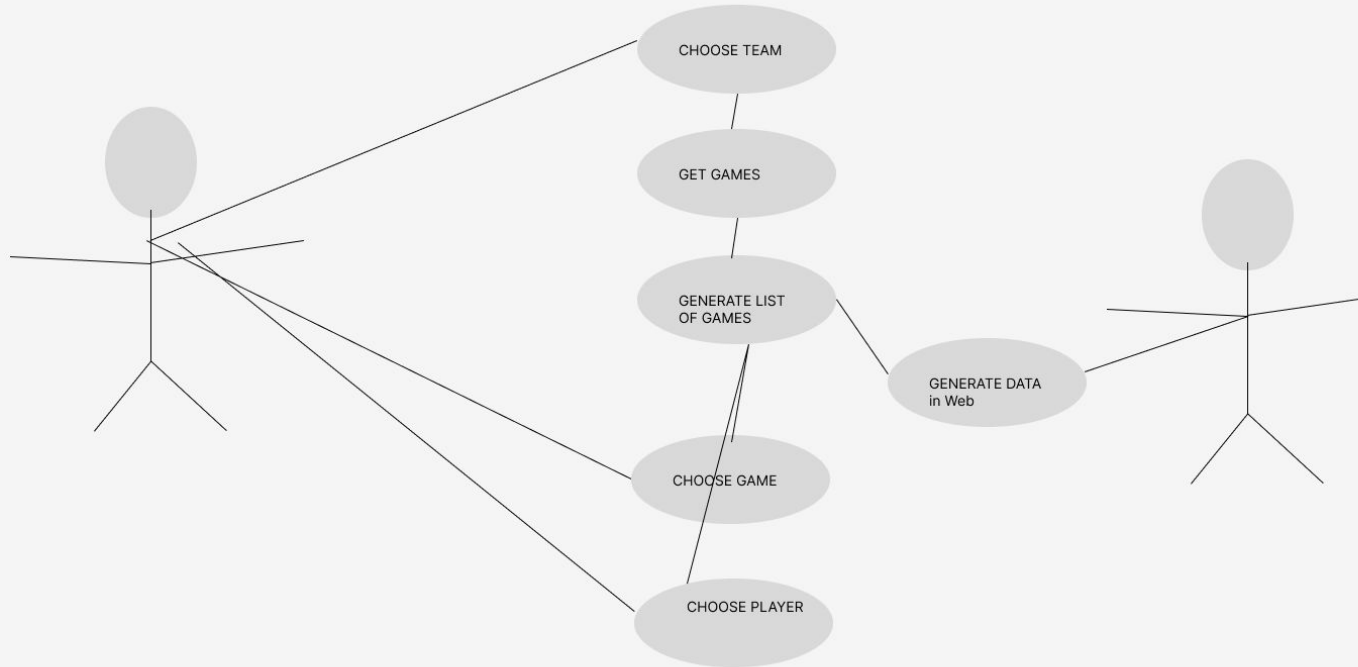

System Description

- Our project is a simple NBA player stats
- People can search up players performance based on teams or seasons
- People can also search for team collective stats and their season accomplishments
- People can view player from other teams stats compared to others per season

E/R diagram

Use Case

Implementation Details

- We would make a simple web dev using html, css, and js to display the basketball stats
- Would display the states when the user specifies what the user need to know
-
