CSE 111 - Project Basketball Stats

Dustin Vy
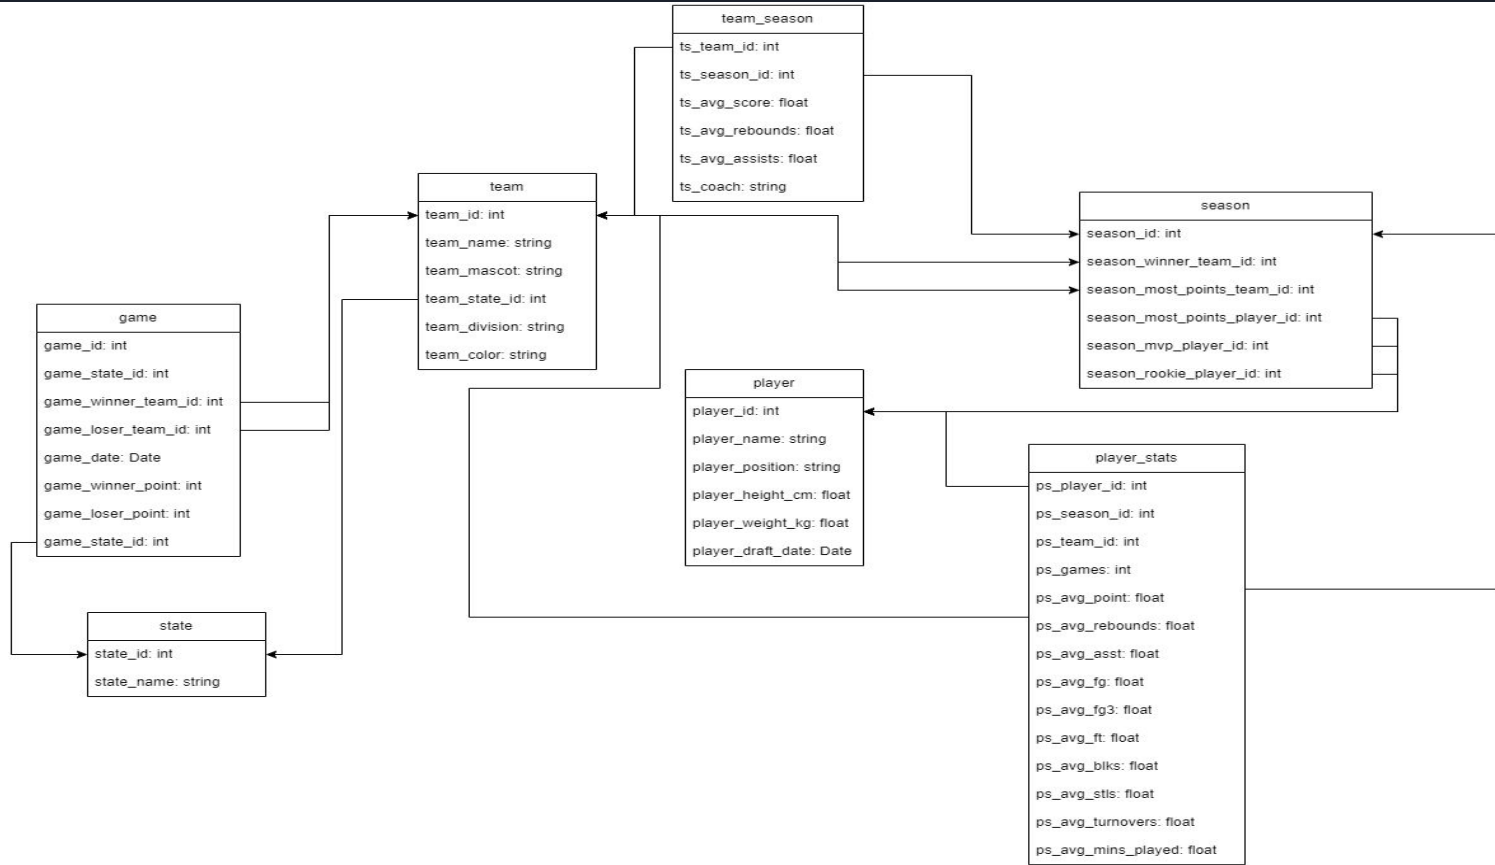

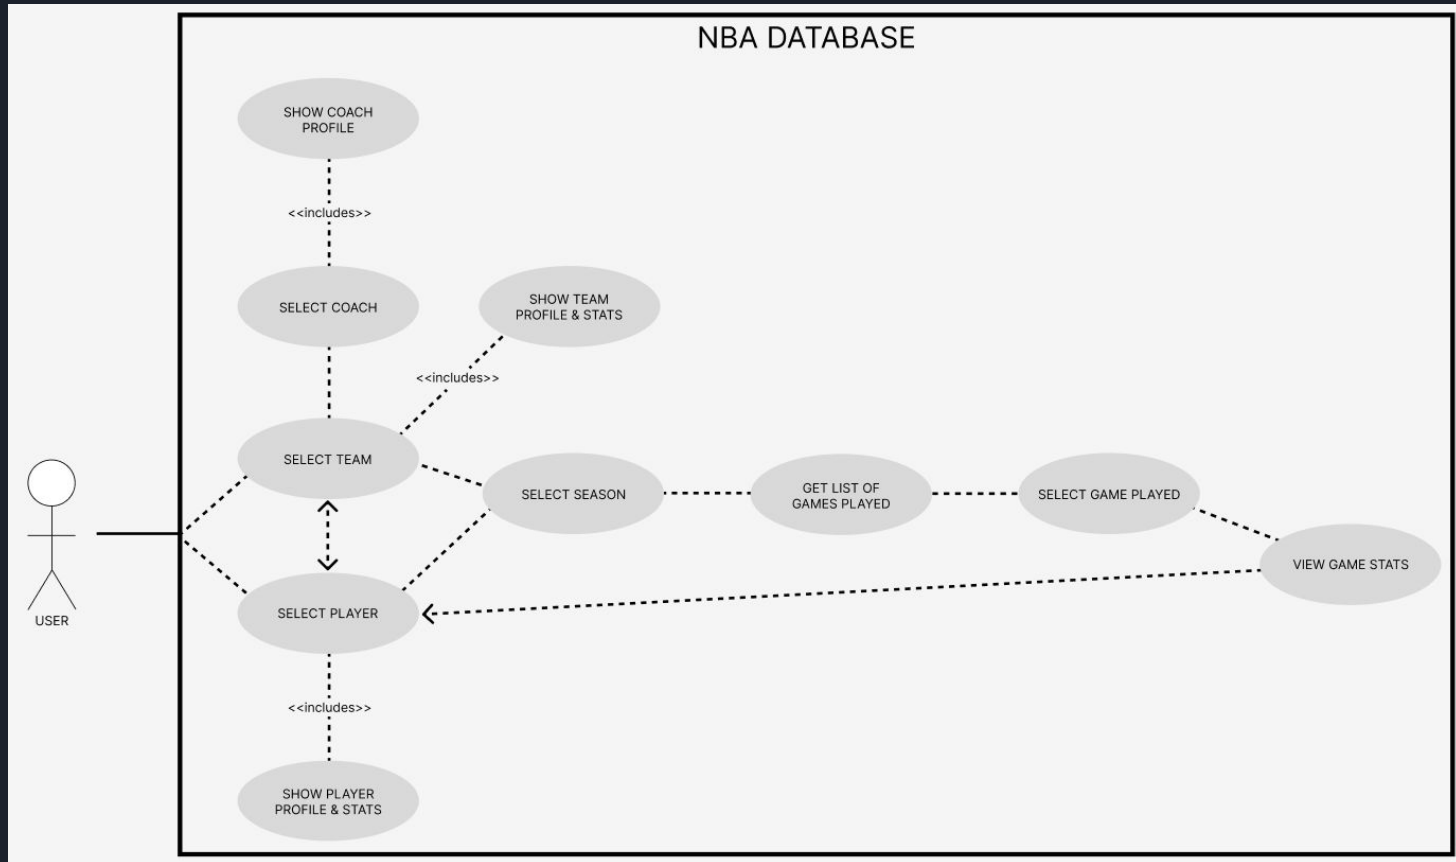

Phien Nguyen

System Description

- Our project is a simple NBA player stats database
- User can view player and team profiles
  - Can view players' or teams' stats based on season
- User can view the teams' achievements
- User can view games played and its box score

E/R Diagram & Schema

Use-Case Diagram

Implementation Details

- Simple web development using HTML, CSS, and JS to display basketball stats
- Goal is to display the stats when the user is searching for a game, team, or player
- Would show based on most recent season by default
